Bobcat Beats: Your Music Exploration, Recommendation, and Organization Guide

Note: Song.java and MusicDatabase.java must be compiled and then MusicBase.java can be ran

This guide will help you navigate and utilize the features of Bobcat Beats to personalize your music experience and efficiently manage your library.

- **Adding New Songs:**

- Locate the **first column** on the left side of the application.
- Enter the **Song Name** in the designated field.
- Enter the **Artist** of the song.
- Select the **Genre** of the song from the provided options.
- Indicate your **Mood** associated with the song by selecting the relevant box (ex., Happy, Calm, Energetic).
- Specify the **Activity** you typically engage in while listening to this song by selecting the appropriate box (ex., Studying, Exercising, Relaxing).
- Once you have filled in all the relevant information, click the **"Add" button** located at the bottom of this column to save the song to your personal music library within the system.

- **Rating Existing Songs:**

- Find the **second column** in the middle of the application.
- Enter the **Song Name** of the song you wish to rate.
- Enter the **Artist** of the song.
- Click the **Find** button to find the song to be rated
- Use the **rate scale (1-10)** to assign a numerical rating to the song based on your preference.
- Further express your opinion by clicking the **"Like" (thumbs up) button** if you enjoy the song or the **"Dislike" (thumbs down) button** if you do not.

- **Exploring New Songs:**

- Navigate to the **third column** on the right side of the application.
- Select the desired **Genre** for the new music you are looking for from the available options.

- Choose the **Artist** you might be interested in (optional). Leave this blank if you are open to discovering new artists.
- Indicate your current **Mood** by selecting an appropriate option (ex., Hype, Calm, Angry).
- Specify the **Activity** you anticipate engaging in while listening to new music (ex., Clubbing, Going to the Beach, Dancing).
- After selecting your desired criteria, click the "**Generate**" button located within this column.
- The system will then process your input and display a song from its library that best matches your specified **Genre**, **Artist** (if provided), **Mood**, and **Activity**.

- **Other Features:**

- Press "Enter" to generate a random song from your library

Enjoy exploring new tunes and efficiently managing your music library with Bobcat Beats! Let us know if you have any other questions.

The screenshot shows the Bobcat Beats application window. It features three main sections: 'Add New Songs', 'Rate Existing', and 'Explore New Songs'. The 'Add New Songs' section has fields for Song Name, Artist, Genre, Mood, and Activities, with a corresponding 'Add' button. The 'Rate Existing' section has fields for Song Name and Artist, a 'Find' button, and a rating scale from 1 to 10 with 'Bad', 'OK', 'Good', and 'Great' labels. Below the scale are 'like' (thumbs up) and 'dislike' (thumbs down) buttons. The 'Explore New Songs' section has dropdown menus for Genre, Artists, Mood, and Activity, with a 'Generate' button. Handwritten annotations in purple ink provide instructions: 'Add new songs - fill in all criteria - hit add' points to the 'Add New Songs' section; 'Search for an existing song - hit find - then rate n like' points to the 'Rate Existing' section; 'Fill in whatever you are looking for (can leave some blank) - hit generate' points to the 'Explore New Songs' section; 'Where song info will be displayed' points to a large empty box at the bottom; and 'After rating top liked artist n genre will appear' points to the same box. A 'Welcome to Bobcat Beats! (Press Enter to get random suggestions)' message is at the bottom of the window.
